Good morning,

Thank you for the response,

As we know District 9 is boxed per design design. Looking at the growth over the next 10 years with approval of the maps provided it is going to be critical with selection of drafts for District 9.

In addition, with any changes Council members's are possibly looking at during our up coming meeting. I have to focus on the forecast for the current maps and future request changes to come for growth.

If this information/data is not available , how can I be expected to make a decision to reflect the accurate data with growth over the next 10 years to protect this District?

Please give me a call to discuss, thank you in advance,

Respectfully,

Yvonne Kinston

CM Kinston.

In speaking with the consultants and staff, they are not aware of how to begin gathering the data to accurately report. So much about what's built there fluctuates based on school designation and national issues. There isn't an approach that we could easily or reliably offer info on this question.

Doug

Good morning,

Will this information be able to be provided prior to the meeting on the October 11th or more towards October 13th?

Respectfully ,

Good morning,

After looking at the interactive maps, I would like to request some data information.

Based on the current map and possible maps A, B and C  
:

What is the % of land that can possibly be used for residential development over the next 10 years in District 9 ?

Thank you in advance,

I am requesting that Council d some outreach engagement with the public.
