

IDENTITY THEFT IS THE **FASTEST** GROWING CRIME IN AMERICA.

Identity theft is the fastest growing crime in America, affecting half a million new victims each year.

Identity theft is the taking of a victim's identity to obtain credit and credit cards from banks and retailers, steal money from a victim's existing account, apply for loans, establish accounts with utility companies, rent an apartment, file for bankruptcy, or obtain a job using the victim's name. Thousands of dollars can be stolen without the victim knowing about it for months or even years.

FAYETTEVILLE POLICE DEPARTMENT**

All an identity theft needs is any combination of your Social Security Number, birth date, address and phone number. This makes it possible to create a fake driver's license and then pose as you in order to apply for credit. The identity theft might put in a change of address with a credit card company so you will not know that someone else is running up charges. Once an identity thief opens one account, opening a second and third is easier.

Identity thieves can get information about you from doctors, lawyers, schools, health insurance carriers, and other places. They may pick up your discarded information, such as utility bills, credit card slips, and bank statements. They may hack into your computer and steal your Social Security or account numbers and credit card information. They may send you an email message asking you to "update" your account information and link you to a fake website so they can steal your personal information.

HOW TO PREVENT IDENTITY THEFT

- **Do not give out personal information** over the phone, through the mail, or over the Internet unless you have initiated the contact or know with whom you're dealing.
- **Shred all documents**, including preapproved credit applications, insurance forms, bank checks and statements you are discarding, and other financial information.
- **Protect your computer from the Internet intruders** -- use "firewalls." Also use anti-virus software and keep it up-to-date.
- **Minimize the identification information** and the number of cards you carry. Take only what you'll actually need.

- **Create hard-to-guess passwords** that cannot be found in any dictionary. Select passwords with at least eight characters and that include a mix of numbers and both uppercase and lowercase letters.
- **Do not put your Social Security Number** on your checks or your credit receipts. If a business requests your Social Security number, give an alternate number.
- **Be careful when using ATM machines and long-distance phone cards.** Someone may look over your shoulder and get your PIN numbers.
- **Make a list** of all your credit card account numbers and bank account numbers with customer service phone numbers, and keep it in a safe place. Cancel all credit cards you have not used in the last six months.
- **Never submit your credit card number** to a website unless it is encrypted on a secured site. Look at the bottom of the screen for a padlock symbol. Do not select to save your information on the site for future transactions.
- **Pay attention to your billing cycles.** Follow up with creditors if bills don't arrive on time. A missing credit card bill could mean an identity thief has taken over your credit account and changed your address.
- **Order your credit report** at least twice a year from the three major credit bureaus: Equifax (www.equifax.com), Experian (www.experian.com), and Trans Union (www.transunion.com). The Fair Credit Reporting Act allows you to get one free credit report from each of the three major credit bureaus once per year. Visit www.annualcreditreport.com.

- **Correct all mistakes on your credit report in writing.** Send a letter to the credit reporting agency identifying the problems by item, include a copy of the credit report, and send the letter return receipt requested.

WHAT TO DO IF YOU'RE A VICTIM

If you're a victim to identity theft, the Federal Trade Commission (FTC) recommends that you do the following:

- **Contact the Fraud Department** of the three major credit bureaus to place a fraud alert on your credit file. The fraud alert requests creditors to contact you before opening any new accounts or making any changes to your existing accounts.
- **Close Fraudulent Accounts**
Close the accounts that you know or believe have been tampered with or opened fraudulently. Use the ID Theft Affidavit (available on the FTC website and accepted by the three major credit bureaus) when disputing new unauthorized accounts.
- **File a police report**
Get a copy of the report to submit to your creditors and others who may require proof of the crime.
- **File your complaint with the FTC**
File your complaint with the FTC at www.consumer.gov/idtheft cases used by law enforcement agencies for investigations. Filing a complaint also helps the agency learn more about identity theft and the problems victims are having so that it can better assist you.
